

## **US 5946 v8**

### **Observer's Notes**

This unit is all about planning, creating and delivering a presentation complete with a slideshow.

The idea is that the presentation will be about the candidate's experience on their Adventurous Journey. The main issue that you are going to come up against with this assessment is that the candidate can NOT supply their own images, video and sound. The NZQA outcomes state that this must all be supplied by the assessor.

This means that the candidate is going to need you take photos and gather film footage and record sound for them to use in their presentation. The candidate is more than welcome to ask you to get certain shots, you just have to be the one to provide the candidate with that content.

You will receive a plan from the candidate along with their completed slideshow. The slideshow must match the candidate's plan. If their slideshow does not meet their plan, it means that they have not created the slideshow according to their plan and have not met that outcome.

It is recommended that you film the candidate's presentation. However, if this is not feasible then a completed observer's checklist complete with comments and examples will suffice.
