

US 9705 v7

Observer's Notes

Welcome to Unit Standard 9705. The objective of the team that you create for your candidates needs to follow one of the following two stipulations:

- Occur in a real-life workplace context using naturally occurring evidence

OR

Occur in a simulated condition that demands an equivalent performance to that demanded in a real-life scenario

Given the nature of US 9705 being a level 3 unit, the complexity of the activity that the feedback will be generated for and the effort of the work involved to accomplish the team's goal should be somewhat substantial. It is suggested that for the Duke of Edinburgh's Gold Award, the team work that the feedback is based off of be part of the service component of the award. We suggest this as the service component of the award is the most similar component of the award to a workplace.

The activity should be of a complexity that valuable feedback can be generated. It is possible to combine this unit standard with another unit standard that is based around teamwork (such as Unit Standard 9681). Feedback can be given and received based around the teamwork generated by that other unit standard.

Note: The team or group does not necessarily need to achieve their objective in order for this unit to be awarded.
