Gifted Online (GO) Modules available in 2020

GO MindPlus (40 mins chat)	This is an abridged version of the MindPlus curriculum and involves the personal development and concept sections.
GO Inquire - Science and History (30 mins chat)	A programme for those who love to delve deeper into topics through questioning and research. Go Inquire will follow a Science or History thread and it is appropriate to do both options if you're interested.
<p>GO Talent programmes provide engaging and varied lessons each week in a range of interest and talent areas, with options to provide optimal challenge and interest. GO Talent uses a smaller section of the NZCGE curriculum. GO Talent is designed to work with students' existing strengths to increase the breadth, depth, sophistication and complexity of students' knowledge and abilities, and to increase students' self-directedness of their learning.</p>	
GO Talent - StoryMakers	For students who are passionate about writing, in one form or another. A storyteller can be a writer who writes, or a writer who doesn't. Some children think up the best stories but just don't like writing, or find it very difficult. Students can make audio files, animations or cartoon strips, or have someone else write their thoughts down for them.
GO Talent - Problem Solvers	For students who are passionate about all things mathematical, it involves logical and creative thinking to puzzle out solutions to problems - from maths, the real world, and our imaginations. Maths, creative, critical and caring thinking skills, research, inventing and innovating skills are used to solve all sorts of problems.
GO Talent - Designers	For students who are passionate about designing, building, making and creating will love these online lessons about design theory, graphics, coding, animation, gaming, modelling, presentation, colour theory, invention and innovation.
GO Talent - Readers	For students who are passionate readers, who relish opportunities to get their teeth into interesting reads, who dream about their books and who would love to work with other passionate readers.
GO Talent - ChessMasters	For students who just love strategic thinking and want to really understand plays and moves as well as learn more about some great Chess Masters.
