#### **INSTRUCTIONS FOR COMPLETION OF COUNTRY QUESTIONNAIRE**

With more than 78,000 deaths each year in the Western Pacific Region, drowning is a leading cause of death and disability. With 30% of those killed under the age of 15, it is the leading cause of death for those aged 5-14 years of age.

Following the launch of the *Global Report on Drowning Prevention* in October 2014, and *Preventing Drowning: An Implementation Guide* in 2017, WHO wishes to scale up advocacy and action for the prevention of drowning in the Western Pacific Region.

This questionnaire was developed to gain further understanding of the current situation of drowning and national responses in regional countries, challenges faced and technical assistance required.

Should countries have any queries, please do not hesitate to contact the WHO responsible officer:
